

## DEGASSING & VAPOR CONTROL SERVICES

With EPA Regulations constantly changing to reduce emissions, you need a specialized crew from USA DeBusk to plan and execute your degassing and vapor control job

### ELITE TEAMS, RELIABLE RESULTS

USA DeBusk's Degassing team provides complete vapor control management for aboveground storage tanks and pipelines. Our Management team has successfully served customers for more than 15 years.

Our Project Managers custom-engineer all services to deliver the highest level of safety, regulatory compliance and customer satisfaction.

- » USA DeBusk teams maintain a superior reputation for strategically planning and managing degassing and vapor control projects safely and effectively.
- » Our degassing and vapor control technologies improve safety while decreasing time on site, reducing costs, and improving overall efficiencies.
- » We offer the ability to clean and degas tanks simultaneously to dramatically reduce turnaround time.

### SAFETY & QUALITY SECOND TO NONE

USA DeBusk teams have the management expertise, advanced training and technology to safely operate in the most hazardous environments, including areas with pyrophoric products, Immediately Dangerous To Life or Health (IDLH) atmospheres, and around vessels with structural damage or external leaks.

USA DeBusk is committed to lead the industry in safety with:

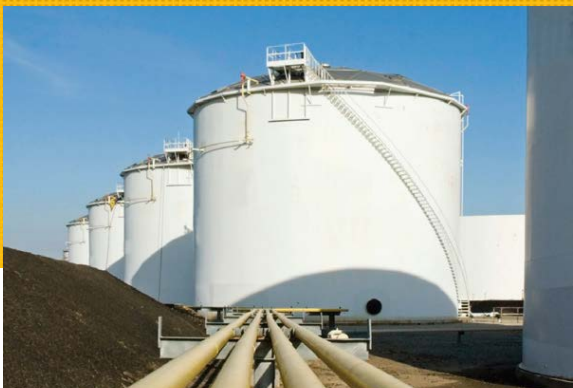

- » Superior hazard management training
- » Work scope developed to minimize confined space entry
- » Potential hazards are identified and a mitigation plan is submitted in advance for client review
- » Ongoing training and Mentorship program

# DEGASSING & VAPOR CONTROL SERVICES

## DEGASSING IS JUST PART OF A FULL LINE OF SERVICES FROM USA DeBUSK:

- » Hydro Cutting
- » Hydro Blasting
- » Hydro Excavation
- » Vacuum Services
- » Unit Clearing & Chemical Cleaning
- » Degassing & Vapor Control
- » Tank, Vessel, and Pipe Cleaning
- » Hot Catalyst Handling
- » Transportation & Storage
- » Fixed Bed Inert Catalyst Handling
- » Pigging & Decoking

## VAPOR COMBUSTION SYSTEM

USA DeBusk uses advanced, mobile thermal oxidation units capable of achieving the highest vapor destruction ratio efficiency while maintaining high-volume throughput.

- » 99.9% DRE (Destruction Ratio Efficiency)
- » Rates up to 10,000 cfm
- » Multiple designs
- » 24-hour response
- » Advanced safety systems

## VAPOR SCRUBBER SYSTEMS

- » Solutions for VOCs, HAPs, H<sub>2</sub>S, chlorinated hydrocarbons, ammonia and other hazardous or odor-causing chemicals
- » Compliance with Federal, state and local regulations

## APPLICATIONS

- » Tank cleaning and degassing
- » Centrifugal sludge processing
- » Depressurizations and de-inventories
- » Tank vent emissions
- » Frac tanks
- » Pipeline cleaning and pigging
- » Natural gas line purging
- » Flare-less turnarounds
