

FABRICATION SERVICES

Advantages

- Experienced management and production team
- In-house design and engineering
- ASME “U” and “R” Stamp certified
- 22,000 sq ft fabrication facility with overhead crane
- B31.8 gas transmission and distribution piping systems experience
- NACE experience
- Class I Div I and Class I Div II experience

Experience in fabricating pressure vessels and equipment

Nitro-Lift is an ASME-coded turnkey provider of fabrication services for custom pressure vessels and equipment used in upstream, midstream, and downstream applications.

Nitro-Lift owns and operates a 22,000 sq ft, 12-bay fabrication facility in Tishomingo, OK, and has service locations in Beaumont, TX, Corpus Christi, TX, Midland, TX, Tulsa, OK, Mill Creek, OK, and Mount Jewell, PA.

CUSTOM DESIGN & ENGINEERING

Nitro-Lift fabrication excels in custom projects with special technical requirements. Our selling engineers work with you from project initiation through completion to meet your critical design needs.

Our team includes in-house CAD designers, code requirement calculation specialists, and professional engineers with extensive experience in midstream applications.

Qualifications include ASME “U” and “R” Stamps

In-house engineering and technical support for custom projects

22,000 sq ft, 12-bay fabrication facility

UNIQUELY QUALIFIED

As an organization providing multi-faceted technical services to the oil and gas industry, we have amassed over four decades of experience and more than 750,000 run-time hours providing nitrogen services for a wide range of applications.

This institutional knowledge gives us practical insight into your needs and a singular ability to design and fabricate vessels and equipment that provide lasting value.

MANUFACTURING CAPABILITIES

- Slug catcher systems
- Pig launchers and receivers
- Pre-fab piping and manifolds
- Skids: injection, blending, meter, butane offloading, ethanol offloading, and piping
- Platforms, walkways, and stairs
- Regen gas scrubbers
- Amine contact towers
- Amine NGL absorbers
- Amine reflux accumulators
- BTEX overhead scrubbers
- BTEX separators
- Cold drain tanks
- Dry air receivers
- Fuel gas scrubbers
- HMO expansion tanks
- Hot oil expansion tanks
- LP closed drain vessels
- Hot oil surge drums
- Methanol storage vessels
- Refrigerant accumulators
- Refrigerant economizers
- Refrigerant oil reclaimer vessels
- Refrigerant suction scrubbers
- Stabilizer NGL surge tanks
- Stabilizer towers
- TEG carbon filter vessels
- TEG flash tanks
- TEG HMO expansion tanks
- TEG still columns
- TEG surge tanks
- Utility air receivers
