

# WASTE SOLUTIONS

## Advantages

- Total waste lifecycle oversight — from origin to final destination
- Cradle-to-grave accountability
- Integration with USAD service portfolio
- Experienced planning, technical management, and project execution
- Assured regulatory compliance
- Centralized project management for safety, speed, and efficiency
- Real-time updates and audit-ready documentation

USA DeBusk offers complete, cradle-to-grave hazardous and non-hazardous waste management programs that combine regulatory compliance, operational precision, and exceptional service delivery.

Our programs integrate seamlessly with the full USA DeBusk service portfolio, providing a single point of contact for waste removal, transportation, and compliant disposal — all backed by a team that understands the operational complexities of your site.

## COMPREHENSIVE LIFECYCLE COVERAGE

- **Waste Identification & Characterization**  
We assess and classify your waste streams using analytical data and generator knowledge to ensure accurate profiling and DOT-compliant documentation.
- **Onsite Waste Handling & Logistics Management**  
From vacuum truck mobilization and drum consolidation to bulk tank cleanouts and packaging — we manage all onsite activities safely and efficiently, coordinating with your operations to minimize downtime.
- **Transportation & Manifest Control**  
We coordinate DOT-compliant transportation using vetted haulers, provide complete manifest tracking, and oversee all EPA-required documentation to ensure full cradle-to-grave accountability.
- **TSDF Coordination & Disposal Oversight**  
We engage directly with approved treatment, storage, and disposal facilities (TSDFs) on your behalf — including profiling, scheduling, approvals, and receiving confirmation.
- **Regulatory Compliance & Reporting**  
We provide full transparency, audit-ready documentation, and real-time updates for your environmental compliance records, supporting your EPA, DOT, and state reporting needs.

Compliant waste handling & transportation

Waste minimization & resource recovery

Synergies with complementary services

Highly trained crews for safe operation

## A COMPREHENSIVE SOLUTION

USA DeBusk is far more than a waste broker. We provide the physical industrial services that generate, manage, and minimize waste at your facility.

Our field crews and environmental teams work together to:

- Conduct tank, vessel, and exchanger cleaning
- Vacuum and bulk remove sludge, product, or rinsate
- Neutralize residuals and prepare systems for RCRA-empty status
- Decontaminate equipment and packaging for shipment
- Mobilize quickly during shutdowns or emergency response events

Our technologies, equipment, and procedures are designed to minimize waste—whether we are dewatering material from tank cleaning or performing closed-loop water filtration during pigging and decoking projects. We plan and control every aspect of your project to meet your waste management objectives.

## ONE SOURCE, UNLIMITED VALUE

Integrating your waste program with USA DeBusk industrial service offerings delivers true, turnkey value for you.

Our unified service model reduces your vendor count, increases site coordination, improves communication, and promotes faster, safer outcomes.

A single point of contact:

- Streamlines procurement
- Promotes unified, stringent safety standards
- Reduces scheduling risks
- Decreases indirect costs
- Creates opportunities to reduce turnaround durations for multiple units or areas of your facility

WE HELP YOU SAFELY,  
EFFICIENTLY HANDLE WASTE  
STREAMS - FROM ORIGIN TO  
FINAL DESTINATION
